PROFILE

A computer science graduate, I am looking for a job in computer science, I have experience in software development, software engineering, interface design, programming, I have a good background on cybersecurity and networking, but I look forward to gaining more experience and adding talent other than problem solving, working under pressure, and fast learning that I have.

EXPERIENCE

Cybersecurity incident response analysis, *STC | Misk*   May 2024
    Dealing with security threats and issuing cyber accident reports, as well as applying
    appropriate procedures to respond to cyber incidents.

Cooperative Training, *STC*   Jul 2023 – Aug 2023
    Creating Database by (Access), developed a web application by (HTML | CSS |
    PHP) and link it with the database

EDUCATION

Computer Science | Umm Al Qura University, *3.85 of 4*   2020 – 2024

COURSES

Advanced Web Attacks, *cyberhub*   May 2025

Network Support and Security, *CISCO Networking Academy*   Jun 2024

Networking Basics, *CISCO Networking Academy*   Jan 2024

Introduction to Cybersecurity, *CISCO Networking Academy*   Jul 2022

Learn ethical hacking from scratch, *Udemy*   2022

Cyber security bootcamp, *GOOGLE DEVELOPER STUDENT CLUB*   Dec 2021

PROJECTS

Graduation Project, *Efhamni Mobile Application*
    The application helps children with Autism spectrum disorder interact with their families easily by collecting PECS (Picture Exchange Communication System) cards in one application, and use an artificial intelligance technology wich is Text-To-Speech to convert the cards into talking cards.

Software Engineer, *Allergy Detector*
    Design the diagrams and methodology for an application that helps the allergy patients.

Web Development, *Sakura Library*
    Developing a website that contains books in various technical fields.

HACKATHONS

Smart Makkah Hackathon, *Smart Screens*   Jun 2023
    Through my participation in the hackathon I gained many useful skills such as
    working under pressure, organizing time, working within a team and other skills.
    My project has qualified for the finals.

SKILLS

Web Development (*HTML, CSS, JavaScript*) │ **Application Development** (Dart (Flutter)) │
Penetration Testing │ **Dealing with Linux** │ **UI/UX Design** │ **Software Engineers** │ **Java** │ **Python** │
Dealing with Microsoft Office softwares │ **Leadership** │ **Hard Working** │ **Problem Solving** │
Fast Learning
